

Rebuttal to Argument in Favor of Measure K

DO YOU TRUST politicians who repeatedly provide misinformation such as “revenue ... could be used to fund ... libraries”? Really? Funding for the Dixon Public Library is provided by the Dixon Unified School District, not the City!!

What about funding for their other listed services? Why are we only hearing about this now? The only thing in this council's eyes are dollar signs.

The “argument in favor” states that there are already “excise and cultivation taxes” in the proposed State initiative. This tax will go to the City's General Fund to be spent where ever!!

What happens if K is defeated? Those who need marijuana for medical purposes see their costs reduced. We have waited 20 years for dispensaries, yet Dixon continues to drag its feet and there is no guarantee even approving this tax will remove the City's ban.

What happens if this Measure succeeds? The City Council will have more money to funnel to employees for salaries and benefits. This remains their top priority while projects for the benefit of all of its citizens continue to sit on the back burner.

This and prior councils were given the opportunity to provide dispensaries and to consider taxation. This was rejected not once but twice. In addition, delivery of medical marijuana into Dixon was prohibited by these same people.

So what has changed? The size of the pot (pun intended) has grown. Everyone can be bought for a price.

Apparently, that threshold has been achieved...

VOTE NO on MEASURE K!
