Solano County, Agriculture

Title: U.S. Department of Agriculture Coronavirus Food Assistance Program (CFAP)

Current (State and/or Federal) Law: Coronavirus Aid, Relief, and Economic Stability Act (CARES Act) and the Commodity Credit Corporation (CCC) Charter Act

Problem Statement: Solano County farmers and ranchers continue to face market disruptions and commodity price decreases due to COVID-19. USDA's second round of CFAP funding support known as CFAP 2 is currently set to expire December 11, 2020.

Proposed Solution: Support ongoing extensions to CFAP as long as COVID-19 continues to negatively impact local farm and ranch marketing channels and commodity prices. Specifically advocate for continued inclusion of specialty crops grown in Solano like almonds, walnuts, tomatoes and grapes.

Proposed Effective / Operative Date of Solution: January 1, 2021

Justification: Federal, State, and Local governments have declared agriculture an essential industry in response to the COVID-19 health crisis. CFAP assistance is helping growers offset COVID-19 related price declines and adapt to market changes as traditionally well-established marketing outlets are currently non-existent or are severely diminished from previous norms.

Implementation: Federal implementation.

Fiscal Impact:

County: None

State/Federal: Federal – CFAP 1 and CFAP 2 have totaled \$30B to date

Solano County, Agriculture

Title: Federal Agricultural Disaster Assistance

Current (State and/or Federal) Law:

Problem Statement: Solano County farmers and ranchers suffered extensive crop and infrastructure losses in the LNU Lightning Complex fire and require assistance to mitigate hazards and rebuild agricultural operations.

Proposed Solution: Support funding allocations to the USDA Farm Services Agency and Natural Resources Conservation Service to provide technical and financial disaster assistance for wildfire recovery efforts including extension of the Wildfire and Hurricane Indemnity Program Plus (WHIP+) which provides direct payments to producers to offset losses.

Proposed Effective / Operative Date of Solution: Immediately

Justification: The LNU Lightning Complex fire damaged or destroyed farms and crops in Solano County in 2020 including:

- 1,300 beehives destroyed (\$340,000 value)
- \$2.25M in livestock forage damage
- \$1.59M in ag fencing damage
- \$325,000 in vineyard and orchard damage and crop losses
- \$1M in wine grape losses due to wildfire smoke taint

USDA Farm Services Agency disaster assistance programs may help agricultural produces offset 2020 crop losses and to rebuild ag infrastructure destroyed by wildfire. Natural Resources Conservation Service programs provide resource protection for burned areas and assistance to local governments to implement emergency mitigation and recovery work.

Implementation: Federal implementation.

Fiscal Impact:

County: None

State/Federal: Unknown

Solano County, Agriculture

Title: Industrial Hemp Registrant Information

Current (State and/or Federal) Law:

California Food & Agricultural Code §81000 - 81015

Problem Statement: The California Department of Food & Agriculture (CDFA) openly posts industrial hemp grower information on its website including location specific information where industrial hemp is cultivated. CDFA does not post crop location information as they do for hemp for any other agricultural commodity. Industrial hemp is a unique agricultural commodity with potential for theft. Actions of thieves and potential thieves, aided by their ability to readily ascertain the location of hemp fields on the CDFA website, pose risks growers and to communities neighboring hemp fields.

Proposed Solution: Restrict website posting of hemp grower contact information to mailing address only.

Proposed Effective / Operative Date of Solution: January 1, 2022

Justification: During the 2019 hemp harvest season the Solano County Sheriff received and responded to numerous reports of nuisance activities, and possible criminal activities, occurring near hemp fields. Removing direct access to industrial hemp growing locations on CDFAs website will reduce crop thefts, grower losses and use of law enforcement resources.

Implementation: N/A

Fiscal Impact:

County: No fiscal impact to the Agriculture Department. May result in law enforcement savings due to reduction in trespassing, theft and other criminal acts associated with hemp.

State/Federal: Possible costs increases to respond to public information requests seeking hemp field location information.

Other States: The Oregon Department of Agriculture only posts mailing addresses of industrial hemp growers on its website.

Solano County, County Administrator's Office

First 5 Solano Children and Families Commission

Title:

Establish a First 5 Center in Fairfield

Current (State and/or Federal) Law:

N/A

Problem Statement:

In Solano County, children who reside in the 94533 zip code in the City of Fairfield rank 3rd highest on the scale of risk factors by zip code for a child's well-being based on an analysis of indicators such as poverty, rates of child maltreatment, 3 and 4-year olds not in pre-school, and 3rd grade math and reading proficiencies.

Proposed Solution:

The First 5 Solano Children and Families Commission proposes a request for \$1.8 million in State funding to establish a Fairfield First 5 Center to be located in the 94533 zip code. The model for this Center is based upon the Vallejo First 5 Center which started delivering services in 2020 and is already demonstrating significant positive outcomes for both the families and the community. This Center in Fairfield will be located in a neighborhood with high poverty rates and will utilize an innovative place-based strategy to provide school readiness and early intervention programs for children; and, coordinated services and resources for parents and families. The Center will be open to all Solano and Fairfield residents with a focus on those with the most need, including the families who are affected by Adverse Childhood Experiences (ACE's) that impact their long-term health and well-being.

Parents and caregivers will find a safe and welcoming environment where they can receive information and holistic support to meet family needs and be connected to appropriate resources in the community. Center staff and community partners will:

- **Support parents**: First 5 Center workshops and classes will help parents raise healthy, happy, and resilient children by offering parent education, peer support, support groups and parent leadership opportunities to strengthen the community.
- Lead educational classes for families: Families will be able to choose from over 20 early learning classes each month, such as art, science, cooking/nutrition, ABC's and 123's, music, movement, baby sign language, preparing for kindergarten, and story time. Dropin playtime, Saturday classes, monthly events, and opportunities to connect with other families in the community will also be offered.
- Be child development experts: The First 5 Center has a staff person dedicated to making sure that each child receives their age appropriate developmental screenings and, if needed, receives access to services at the earliest possible moment to ensure a healthy life trajectory.
- Connect families to needed resources: Center staff will connect families to helpful community resources. Common community resources and services will be co-located to

address basic needs supports, housing, employment services, food, health and dental services, child support services and others.

Proposed Effective / Operative Date of Solution:

07/01/2021

Justification:

A child's brain is 90% developed by age 5, providing a critical window of opportunity to support strong beginnings. Research shows that challenges children face early in life can lead to life-long negative outcomes and high-community cost, including school drop-out, incarceration, chronic health problems, and isolation within the community. The proposed Center will provide the programs and services that can change these outcomes. By taking a dual-generational approach to service delivery, the entire family will be strengthened, providing the best opportunity for success for young children throughout their lives.

In 2017, First 5 Solano analyzed 9 indicators of child well-being by zip code. First 5 Solano found that several communities in the county were at higher risk for negative outcomes for young children, based upon their zip code. First 5 Solano has made progress in addressing disparities in the 2 highest risk communities, Vallejo and Rio Vista, by starting a First 5 Center in Vallejo in the highest area of poverty in Vallejo, with census tracts of 69% and 78% childhood poverty; and investing in school readiness activities at the Family Resource Center in Rio Vista starting in 2018.

Even with the challenges posed by the COVID-19 pandemic, First 5 Solano has already seen significant engagement from this investment in the community. First 5 Solano wants to replicate this First 5 Center effort in Fairfield, which also has significant risk factors for childhood well-being. The 94533 zip code has approximately 19% of Solano County's 0-5 population which is over 6,200 young children. By providing this community-based hub, First 5 Solano intends to break the cycle of negative outcomes for a new generation of children and provide them with a strong start in life. Families visiting the Fairfield First 5 Center with their children will be equipped with the tools and resources to support their child's healthy development and school readiness. Center staff will help to remove barriers to service access, by bringing nonprofits and other county agencies onsite to deliver needed services at the center.

The requested state funding would be utilized to secure a site and make the necessary tenant improvements to create a First 5 Center. The ongoing cost to operate the center of approximately \$600,000 annually will be covered by the First 5 Solano Children and Families Commission.

Implementation:

Should this \$1.8 million be allocated by the State, First 5 Solano will initiate a start-up plan which will include a business plan, site selection, tenant improvement plan, community engagement, budget and program planning, and other activities to prepare for an opening by July 2022.

Fiscal Impact:

First 5 Solano/Solano County: An ongoing commitment of \$600,000 annually to operate programs and services at the Fairfield First 5 Center will be provided by the First 5 Children and Families Commission.

State: \$1.8 million one-time investment

2021 LEGISLATIVE PROPOSAL Solano County, General Services, Fleet Management

Title: Alternative Fuels Definition Change and Addition of Renewable Fuels to Alternative Fuel Infrastructure Strategy

Current (State and/or Federal) Law: AB1074 (February 27, 2015) amendment, specifically Section 25142 of the Public Resources Code – "Alternative Fuel" and Section 25991 "alternative refueling structure".

Problem Statement: The current definition of "Alternative Fuel" includes biodiesel, bioalcohol (methanol, ethanol, and butanol), electricity, hydrogen, compressed fossil or non-fossil natural gas, liquefied fossil or non-fossil natural gas, vegetable oil, propane, and other biomass source; however, renewable gasoline and renewable diesel are not listed.

Proposed Solution: Amend the existing list of "Alternative Fuel(s)" to include renewable fuel sources (e.g. renewable gasoline, renewable diesel, and renewable jet fuel) and add these fuels to the alternative refueling infrastructure strategy.

Proposed Effective / Operative Date of Solution: January 2022

Justification: Renewable fuel, also called hydrotreated vegetable oil, is sustainable and can reduce greenhouse gas emissions by up to 80%. Renewable fuels rely solely on renewable sources. They can made from waste products such as animal fat, used cooking oil, various vegetable oil processing wastes and residues, fish fat, technical corn oil, and palm oil. Renewable fuels are differentiated from biofuels by the refining process, and chemical composition.

Renewable fuels do not have the most harmful component of fossil fuel, aromatics, and are made from renewable feedstocks instead of crude oil.

Implementation: Renewable fuels are created using a hydrotreating process, that creates a pure hydrocarbon fuel, with similar composition to fossil fuels; therefore, storage tanks, fueling station, pumps, and vehicles do not require any modification to store, pump, or consume renewable fuels. We are using renewable diesel now; however, the current state incentives will run out in 2030 and the price of renewable diesel is likely to surpass petroleum diesel. If renewable diesel were considered an alternative fuel, the demand will likely increase and the price would drop with economies of scale

Fiscal Impact: renewable fuels currently cost 20-25% more than fossil fuels County: \$200,000 (est.) annually State/Federal: \$84,000,000 (est.) annually
