Description of Nature, Purpose and Beneficiaries of Project:

The Roof Rehabilitation Project consists of multiple roofs (Maintenance Building, Blower Building, and Digester Control Building) that have been existing since the 1990s. The roofs under this Project are at or near the end of their useful life for a tar and gravel roof system (30 years), or have demonstrated deterioration evidenced by regular leaks. This Project will replace the existing built-up tar and gravel roof in the Maintenance Building and Blower Building with new roofing, new drains, flashing, sheet metal, walking pads, and fall protection rated skylights to maintain protection of the various critical equipment, systems, and Maintenance office spaces beneath. It also includes restoring the existing roof of the Digester Control Building by sealing roof penetrations with roofing material and re-embedding the existing gravel.
