

BALLOT ARGUMENT: YES ON MEASURE H

Measure H will provide short-term funding that will be directed to our local cities for streets and roads repair in your neighborhood. All revenue raised by this measure is required by law to stay in Solano County.

Together, Measure H and Measure G will fix our local streets and roads, improve road safety, and support transportation for seniors and people with disabilities.

Measure H is the safe, reliable, temporary funding we need and includes the following public protections:

- It expires in 5 years
- No funds will be spent without approval from a citizens’ oversight committee
- All funds must be spent in accordance with the authorized purpose (Measure G)
- Annual audits of all expenditures will be published publicly
- All revenue will be kept in our local communities and can’t be taken by the state

Measure G directs all funds raised by Measure H to be used to fix potholes, repair and maintain local streets and roads, improve road safety, and provide transportation for seniors and people with disabilities.

The Solano 2014 Annual Pothole Report shows that 50% of local streets and roads are in poor or at risk condition and are getting worse. Due to cuts in state funding, Solano County has less than half the amount of money needed to maintain our roads and not enough funding to improve them.

To address this urgent need, the mayors of Benicia, Dixon, Fairfield, Rio Vista, Suisun City, Vacaville, and Vallejo requested that Measure H be placed on the ballot to provide the funding they need to fix roads and improve road safety.

We urge you to join us and vote YES on Measure H.
