4. PRESENTATION(s)

a. Impact of China's National Sword on Local Recycling Market

by: Local representatives of Mount Diablo Resource Recovery, Recology, and Republic Services

Until recently, China has been the largest importer of recycled materials in the world. Their enactment of the National Sword policy makes garbage contamination rules on recycled imports stricter. The industry standard has been 5% for years; National Sword policy reduces the contamination rate significantly to less than 1%. With fewer buyers, there is a surplus of materials in the market and a significantly lower price for recovered materials.

Representatives from the contracted waste and recycling haulers serving the cities and county of Solano will address the local impact of the National Sword Policy as it relates to the collection and management of local curbside recyclables.
