

COVID-19 Reporting for Workplaces – Solano County

Solano County Public Health (SCPH) partners with Solano County businesses to mitigate COVID-19 outbreaks in the workplace. An outbreak in most non-healthcare worksites is defined as 3 or more cases of COVID-19 at a worksite within a 14-day period. Solano County utilizes the Shared Portal for Outbreak Tracking (SPOT) to receive information about COVID-19 outbreaks in local business settings. SPOT makes it easy for business owners or managers to securely report COVID-19 outbreaks to SCPH and receive assistance that can be utilized to slow the spread of COVID-19 in the workplace and community. This will allow for more efficient reporting and support.
