Test	<i>Sarcoptes scabiei</i> (scabies) screening
Test Description	Detection of <i>Sarcoptes scabiei</i> uses microscopic analysis of skin scarping to detect the potential parasitic mite via saline mount.
Acceptable specimens	Skin scrapings (preferably between fingers and fold of wrist) should be collected in a dry, sterile test-tube or in a clean paper wrap.
Specimen storage and shipping	Keep the specimen at room temperature and transport to the laboratory as soon as possible.
