

On September 25, 2012, the Planning Commission approved a new use permit (U-12-10) for modifications to the wireless communication facility at this location. The approval included replacement of antennas, the addition of a GPS unit, and the addition of 10 Remote Radio Units to the existing structure. A use permit extension was granted until August 16, 2022.

Renewal of use permit U-12-10 was not thereafter filed timely. The applicant now requests a number of modifications to the wireless communications facility and, due to the expired permit, must obtain a new use permit.. On February 8, 2024, the applicant filed the use permit application now before the Planning Commission.

III. LOCATION:

The project is located at 3600 Ritchie Rd, Fairfield CA, 94534, atop Nelson Hill and the site borders the City of Fairfield to the southeast, just north of Highway 12 off Cordelia Rd and Ritchie Road (private). As identified by the General Plan, the property is situated within the Traditional Community - Residential district.

The subject property is zoned Rural Residential "RR-2.5" and is vacant aside from the existing tower. Existing external access to the site is via Cordelia Road with internal access via an existing driveway (Ritchie Road).

IV. PROJECT DESCRIPTION:

The applicant proposes a number of equipment changes to the facility including the replacement of antennas, and the addition of a new surge suppressor unit and cabling, and the replacement of remote radio units. A detailed list of the proposed equipment changes to the wireless communications facility is outlined in Attachment H - Project Description.

Water and sewer service is unnecessary, and the facility will be unmanned. The site is typically serviced once per month by a maintenance technician.

V. ANALYSIS:

A. General Plan Consistency:

The project is proposed on land designated Traditional Community - Residential by the Solano County General Plan Land Use Diagram. The project as designed and conditioned is consistent with General Plan goals and policies including, but not limited to, those related to public safety and emergency response, protection of scenic resources, and land use development.

B. Zoning Consistency:

The subject property is located within the Rural Residential "RR-2.5" zoning district. This district requires the issuance of a Use Permit to authorize new wireless telecommunications facilities subject to conditional approval by the Planning Commission. The proposed project complies with all applicable zoning requirements with the incorporation of conditions of approval.

C. Alternatives Analysis:

Per Section 28.81(F) of the Zoning Regulations, an alternative analysis shall be provided for any facility requiring a Use Permit before the Planning Commission. The Alternatives Analysis shall consider alternative

locations and designs for the proposed facility, including those alternative sites that would not require a Use Permit. The alternative analysis report provided by the applicant (Attachment F) states that alternative site analysis is inapplicable to the project because the equipment will be removed and replaced on an existing monopole.

D. Radio-Frequency Exposure Review:

Per Section 28.81(H) of the Zoning Regulations, a Radio Frequency "RF" Environmental Evaluation Report shall be provided which demonstrates that RF emissions from the facility in combination with existing RF emissions from nearby facilities will meet the current FCC adopted exposure standard.

The project proponent has provided a radio frequency - electromagnetic energy (RF-EME) compliance report (Attachment G) prepared by Waterford Consultants, LLC to determine RF- EME exposure levels from proposed AT&T wireless communications equipment at this site. As described in the RF report, the Federal Communications Commission (FCC) has developed Maximum Permissible Exposure (MPE) Limits for general public exposures and occupational exposures.

In summary, based on worst-case predictive modeling, there are no modeled exposures on any accessible ground level-walking/working surface related to AT&T's equipment in the area that exceed the FCC's occupational and/or general public exposure limits at this site. The proposed operation will not expose members of the General Public to hazardous levels of RF energy at ground level or in adjacent structures.

RF alerting signage at the base of the monopole and restricting access to authorized climbers that have completed RF safety training is required for Occupational Environment Compliance. The project is conditioned to provide appropriate signage.

E. Environmental Determination:

The Department of Resource Management is recommending that the project is exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guidelines Section 15301 (Existing Facilities) and 15303 (New Construction or Conversion of Small Structures). The Existing Facilities exemption consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use. The New Construction or Conversion of Small Structures exemption consists of the construction and location of limited numbers of new, small facilities or structures, and installation of small new equipment and facilities in small structures. The guidelines state examples including, but not limited to, utility extensions and appurtenant structures.

The project consists of replacing, removing, and adding equipment to an existing tower. There is no evidence in the record that the project would result in substantial, or potentially substantial, adverse environmental changes to any of the physical conditions within the area, including land, air, water, minerals, flora, fauna, ambient noise, or objects of historic or aesthetic significance. It has been determined that the project is not in an environmentally sensitive location, is not on a hazardous waste site, will not cause substantial change in the significance of a historical resource, and will not result in damage to scenic resources within a scenic highway. Staff therefore recommends that the project be found categorically exempt from CEQA under CEQA Guidelines Section 15301 and 15303.

F. Public Notice

Consistent with Sections 28.106 and 28.04 of the Solano County Code, a public hearing notice was published in the Daily Republic at least 15 days prior to the public hearing.

G. Agency Review

As part of the Department of Resource Management development review process, the application materials have been reviewed by the County Development Review Committee. A project notification was sent to the City of Fairfield, but no comments have been received to date.

H. County Good Neighbor Policy

On April 9, 2024, the Board of Supervisors adopted a Good Neighbor Policy that strongly recommends project proponents engage with the community to increase transparency and public dialogue prior to the formal public hearing process. Although additional outreach is not a requirement, the Planning Services Division has recommended that New Cingular Wireless reach out to property owners within ½ mile of the property prior to the public hearing.

A letter was sent on April 11, 2024 from Planning Division staff to the applicant regarding County's Good Neighbor Policy steps for participation (Attachment I). At the time of writing this report, the applicant has not responded.

SOLANO COUNTY PLANNING COMMISSION RESOLUTION NO. 24-xx

WHEREAS, the Solano County Planning Commission has considered Use Permit Application No. U-24-02 of **Centerline LLC, an agent for New Cingular Wireless**, to replace antennas, electrical equipment and reduce the height of the existing monopole from 20 feet 11 inches to 20 feet. The site is located at 3600 Ritchie Road, bordering the City of Fairfield in the Rural Residential (RR 2.5) zone, APNs 0044-050-160 & 0044-050-430; and

WHEREAS, said Planning Commission has reviewed the report of the Department of Resource Management and heard testimony relative to the subject application at the duly noticed public hearing held on June 6, 2024; and

WHEREAS, after due consideration, the Planning Commission has made the following findings regarding said proposal:

- 1. The establishment, maintenance, or operation of the proposed use is in conformity with the County General Plan with regard to traffic circulations, population densities, and distribution, and other aspects of the General Plan considered by the Zoning Administrator or Planning Commission to be pertinent.**

The replacements and additional equipment will allow continued operation and maintenance of the collocated wireless communications facility. The zoning of the property along with the existing use and proposed modifications is consistent with the goals, objectives, and policies of the Solano County General Plan concerning wireless facilities, including the Land Use, Resources, and Public Facilities and Services Chapters.

- 2. Adequate utilities, access roads, drainage, and other necessary facilities have been or are being provided.**

Existing external access to the site is via Cordelia Road with internal access via an existing driveway (Ritchie Road). The site has existing electrical power and the building plans will be reviewed and approved by the Solano County Building and Safety Division before a building permit is issued. No additional utilities will be required for project implementation.

- 3. The subject use will not, under the circumstances of the particular case, constitute a nuisance or be detrimental to the health, safety, peace, morals, comfort or general welfare of persons residing or working in or passing through the neighborhood of such proposed use, or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the County.**

As conditioned, the proposed telecommunications facility will not constitute a nuisance to surrounding properties, nor will it be detrimental to the health, safety, or welfare of County residents. The Radio Frequency emissions report prepared for the project indicates that the facility will be in compliance applicable to the Federal Communications Rules and Regulations for RF emissions.

4. The facility complies with all applicable provisions of section 28.81 “Wireless Communications Facilities” of the Solano County Code.

The facility is allowed in the zoning district, it exhibits sufficient consistency with the surrounding environment and conforms to the height, screening, noise, parking, and setback requirements.

5. No alternative site or design is available that would allow for the issuance of a Use Permit before the Zoning Administrator for the facility.

The applicant has submitted an Alternatives Analysis which adequately explains why alternative locations were not considered, as the project is for the alteration of a pre-existing structure.

6. The Radio Frequency (RF) Environmental Evaluation Report for the facility shows that the cumulative radio-frequency energy emitted by the facility and any near-by facilities will be consistent with FCC regulations.

7. The facility blends in with its existing environment and will not have significant visual impacts.

The wireless communications facility is located at the top of a small ridge with oak and other trees growing at varying intervals. The tower is not noticeably visible from the surrounding properties. New antennas and monopole shall blend in with the surroundings and will not cause an adverse visual impact along the Scenic Corridor.

8. The project is exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guidelines Section 15301, Existing Facilities, and Section 15303, New Construction or Conversion of Small Structures. A Notice of Exemption shall be filed with the State Clearinghouse and Clerk of the Board.

The CEQA Guidelines Section 15301 (Class 1) exemption consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use. The CEQA Guidelines Section 15303 (Class 3) exemption consists of construction and location of limited numbers of new small facilities, equipment, and structures, and installation of small new equipment and facilities in small structures.

The project consists of replacing, removing, and adding equipment to an existing tower. There is no evidence in the record that the project would result in substantial, or potentially substantial, adverse environmental changes to any of the physical conditions within the area, including land, air, water, minerals, flora, fauna, ambient noise, or objects of historic or aesthetic significance. It has been determined that the project is not in an environmentally sensitive location, is not on a hazardous waste site, will not cause substantial change in the significance of a historical resource, and will not result in damage to scenic resources within a scenic highway.

BE IT THEREFORE RESOLVED, that the Planning Commission has approved Use Permit Application No. U-24-02, subject to the following recommended conditions of approval:

ADMINISTRATIVE

1. **Land Use.** Approval is hereby granted to Centerline LLC. The Solano County Planning Commission has considered Use Permit Application No. U-24-02 of **Centerline LLC., an agent of New Cingular Wireless**, to replace antennas, electrical equipment and reduce the height of the existing monopole from 20 feet 11 inches to 20 feet. The development is in accord with the application materials and development plans submitted with Use Permit Application U-24-02 on February 8, 2024, and as approved by the Solano County Planning Commission.
2. **Permit Term.** Pursuant to Section 28.81 (J) of the Wireless Ordinance, the subject use permit shall be granted for a fixed term of ten (10) years and shall expire June 6, 2034. Consideration of a new land use permit is required should the need for the wireless communication facility remain upon permit expiration.
3. **Renewal.** The permit term may be renewed administratively by the Zoning Administrator upon verification of the permit holder's continued compliance with the findings and conditions of approval. A Land Use Renewal application shall be submitted to the Planning Services Division prior to the expiration of the permit term.
4. **Revisions or Modifications in Land Use.** No additional land uses, activities for new or expanded buildings shall be established beyond those identified on the approved development plan submitted on February 8, 2024 and detailed within the project description without prior approval of a revision, amendment, or a new use permit and subsequent environmental review.
5. **Removal Upon Discontinuation of Use.** All equipment associated with the wireless communications facility shall be removed within 90 days of discontinuation of the uses and the site shall be restored to its original pre-construction condition. The operators agree to such removal and allow the County access across private property to effect such removal. Written verification of the removal of the wireless communications facility shall be provided to the Planning Services Division within 90 days of discontinuation of use.
6. **Security to Provide for Removal of Equipment.** Prior to issuance of a building permit, the applicant or permittee shall provide a bond, cash, or other surety, to the satisfaction of the Department of Resource Management, for the removal of the facility in the event that the use is abandoned, or the use expires, or is revoked, or is otherwise terminated. The amount of security shall be based on a cost estimate provided by a contractor or other qualified professional to the satisfaction of the Director of Resource Management. If the permittee does not remove any obsolete or unused facilities as described above, the financial guarantee shall be used by the County to remove any obsolete or unused facilities and to return the site to its pre-development condition. A financial assurance must be irrevocable and not cancellable, except by the County. Each form of financial assurance must remain valid for the duration of the permit and for six months following termination, cancellation, or revocation. Any unused financial guarantee shall be returned to the applicant upon termination of the use and removal of the facility, or transfer of the lease accompanied by the financial guarantee by the new lessee or owner.

7. **Indemnification.** By acceptance of this permit, the permittee and its successors in interest agree that the County of Solano, its officers, and employees shall not be responsible for injuries to the property or persons arising from the issuance or exercise of this permit. The permittee shall defend, indemnify, and hold harmless the County of Solano, its officers, and employees from all claims, liabilities, losses, or legal actions arising from any such injuries. The permittee shall reimburse the County for all legal costs and attorney fees related to litigation based on the issuance and/or interpretation of this permit. This agreement is a covenant that runs with the land and shall be binding on all successors in the interest of the permittee.
8. **Failure to Comply.** Failure to comply with any of the conditions of approval or limitations set forth in this permit shall be cause for the revocation of the Use Permit and cessation of the permitted uses at the Permittee's expense.

GENERAL WIRELESS COMMUNICATIONS FACILITY STANDARDS

9. **Design Consistency with the Surrounding Environment.** To the maximum extent feasible, the facility shall blend in with the predominant features of the existing natural and/or built environment. To this end, the facility shall be painted brown to match the existing, nearby vegetation.
10. **Radio-frequency (RF) exposure.** Prior to operation of the facility, the permittee shall comply with all requirements of the Federal Communications Commission including RF signage. Signage shall be consistent with the recommended signage/compliance plan contained in the provided RF report.
11. **Cabling.** All visible cabling between equipment and antennas shall be routed within the building wherever feasible. Cabling on the exterior of a building or monopole shall be located within cable trays painted to match. All cabling shall be performed in accordance with the NEC.
12. **Painting and Lighting.** The facility shall be generally unlit except when authorized personnel are present at night. All facilities shall be painted brown consistent with #9 to minimize visual impact.
13. **Noise.** The facility shall be designed to minimize noise and adhere to a maximum exterior noise level of 65 dB at the property lines.
14. **Accessory Structures.** Enclosures and cabinets housing equipment shall meet setback and height restrictions. Such structures shall appear architecturally compatible with their surroundings and be designed to minimize their visual impact. To meet this requirement, underground vaults may be required.
15. **Roads and Parking.** The facility shall be served by the minimum roads and parking areas necessary and shall use existing roads and parking areas whenever possible.
16. **Provisions for Future Co-location.** The facility shall be encouraged to promote future facility and site sharing.

17. Underground utilities. All on-site utility lines leading to and connecting the leased areas and equipment shelters shall be located underground.

18. Facility Maintenance. All facility components including, but not limited to, tower, antennas, microwave dishes, remote radio units, equipment cabinets, and fencing shall be maintained in good condition, including ensuring the facilities are reasonably free of:

- a. Rust and corrosion;
- b. Chipped, faded, peeling and cracked paint;
- c. Graffiti, bill, stickers, advertisements, litter and debris; and
- d. Broken or misshapen structural parts
- e. The permittee shall take such measures as may be necessary or as may be required by the County to prevent offensive noise, lighting, dust or other impacts which constitute a hazard or nuisance to surrounding properties.
- f. The premises shall be maintained in a neat and orderly manner and kept free of accumulated debris and junk

19. Fire District. The permittee shall comply with the Cordelia Fire Protection District requirements.

Environmental Health Division

20. Hazardous Materials Business Plan. The facility shall ensure that its Hazardous Materials Business Plan (CERS id #10479376) on the California Environmental Reporting System is accurate and that it is updated at least once every year.

Action Required	When	Verified by	Date
Submit Hazardous Materials Business Plan	Prior to construction and once a year after		

Radio Frequency(RF) Report

21. The permittee shall install signage with contact information (Caution 2B) at the base of the monopole to inform authorized climbers of potential conditions near the antennas, as recommended in Figure 2 within the Radiation Frequency (RF) report.

Action Required	When	Verified by	Date
RF alerting signage	Prior to Certification of Occupancy		

Building Division

22. Building Permit. The permittee shall obtain approval from the Building and Safety Division prior to construction, erection, enlargement, altering, repairing, moving, improving, removing, converting, demolishing any building or structure, fence or retaining wall regulated by the Solano County Building laws. Submit four (4) sets of plans to the Building and Safety Division for plan review and permits prior to beginning any improvements.

Action Required	When	Verified by	Date
File building permit application as necessary	Prior to construction		

I hereby certify that the foregoing resolution was adopted at the regular meeting of the Solano County Planning Commission on June 6, 2024, by the following vote:

RE: Alternative Site Analysis – AT&T Cell Site Modification – 3600 Ritchie Rd

AT&T is proposing to modify an existing telecommunication facility. Alternative site analyses are intended for use in situations where a carrier proposes to develop a new, tower-based wireless facility. In such situations it is reasonable for the County to require an applicant to justify why it is not collocating on existing monopoles or other support structure in the general vicinity. In the case at hand, AT&T is proposing to remove and replace equipment on an existing monopole. Thus, an alternative site analysis is inapplicable to current circumstances.

AT&T currently has (9) antennas installed on a 19' monopole. AT&T is proposing to remove (9) antennas and replace with (12) antennas on the existing monopole. (6) of the proposed antennas will be stacked so the antenna height will actually decrease from 20'11" to 20'. The modification to the associated will causes no visual impact and will not defeat the existing concealment.

In sum, though an alternative site analysis is inapplicable to the currently proposed project, the above demonstrates that the proposed design is not only the sole means by which AT&T can ensure the provision of state-of-the-art technology to its customers, but it is also the least intrusive alternative capable of meeting the coverage and capacity objectives.

Sincerely,

Greg Davis

Radio Frequency Emissions Compliance Report For

Site Name:	Cordelia	Site Structure Type:	Monopole
Address:	3600 Ritchie Road Fairfield, CA 94534	Latitude:	38.213245
Report Date:	November 29, 2023	Longitude:	-122.132779
		Project:	Modification

Compliance Statement

Based on information provided by J5 Infrastructure Partners, LLC and predictive modeling, the Cordelia installation proposed by will be compliant with Radiofrequency Radiation Exposure Limits of 47 C.F.R. §§ 1.1307(b)(3) and 1.1310. RF alerting signage at the base of the Monopole and restricting access to authorized climbers that have completed RF safety training is required for Occupational environment compliance. The proposed operation will not expose members of the General Public to hazardous levels of RF energy at ground level or in adjacent structures.

Certification

I, David C. Cotton, Jr., am the reviewer and approver of this report and am fully aware of and familiar with the Rules and Regulations of both the Federal Communications Commissions (FCC) and the Occupational Safety and Health Administration (OSHA) with regard to Human Exposure to Radio Frequency Radiation, specifically in accordance with FCC's OET Bulletin 65. I have reviewed this Radio Frequency Exposure Assessment report and believe it to be both true and accurate to the best of my knowledge.

David Charles Cotton, Jr.
Registered Professional Engineer (Electrical)
State of California, 18838

General Summary

The compliance framework is derived from the Federal Communications Commission (FCC) Rules and Regulations for preventing human exposure in excess of the applicable Maximum Permissible Exposure ("MPE") limits. At any location at this site, the power density resulting from each transmitter may be expressed as a percentage of the frequency-specific limits and added to determine if 100% of the exposure limit has been exceeded. The FCC Rules define two tiers of permissible exposure differentiated by the situation in which the exposure takes place and/or the status of the individuals who are subject to exposure. General Population / Uncontrolled exposure limits apply to those situations in which persons may not be aware of the presence of electromagnetic energy, where exposure is not employment-related, or where persons cannot exercise control over their exposure. Occupational / Controlled exposure limits apply to situations in which persons are exposed as a consequence of their employment, have been made fully aware of the potential for exposure, and can exercise control over their exposure. Based on the criteria for these classifications, the FCC General Population limit is considered to be a level that is safe for continuous exposure time. The FCC General Population limit is 5 times more restrictive than the Occupational limits.

In situations where the predicted MPE exceeds the General Population threshold in an accessible area as a result of emissions from multiple transmitters, FCC licensees that contribute greater than 5% of the aggregate MPE share responsibility for mitigation.

Table 1: FCC Limits

Frequency (MHz)	<i>Limits for General Population/ Uncontrolled Exposure</i>		<i>Limits for Occupational/ Controlled Exposure</i>	
	Power Density (mW/cm ²)	Averaging Time (minutes)	Power Density (mW/cm ²)	Averaging Time (minutes)
30-300	0.2	30	1	6
300-1500	f/1500	30	f/300	6
1500-100,000	1.0	30	5.0	6

f=Frequency (MHz)

Based on the computational guidelines set forth in FCC OET Bulletin 65, Waterford Consultants, LLC has developed software to predict the overall Maximum Permissible Exposure possible at any location given the spatial orientation and operating parameters of multiple RF sources. The power density in the Far Field of an RF source is specified by OET-65 Equation 5 as follows:

$$S = \frac{EIRP}{4 \cdot \pi \cdot R^2} \text{ (mW/cm}^2\text{)}$$

where EIRP is the Effective Radiated Power relative to an isotropic antenna and R is the distance between the antenna and point of study. Additionally, consideration is given to the manufacturers' horizontal and vertical antenna patterns as well as radiation reflection. At any location, the predicted power density in the Far Field is the spatial average of points within a 0 to 6-foot vertical profile that a person would occupy. Near field power density is based on OET-65 Equation 20 stated as

$$S = \left(\frac{180}{\theta_{BW}} \right) \cdot \frac{100 \cdot P_{in}}{\pi \cdot R \cdot h} \text{ (mW/cm}^2\text{)}$$

where P_{in} is the power input to the antenna, θ_{BW} is the horizontal pattern beamwidth and h is the aperture length.

Some antennas employ beamforming technology where RF energy allocated to each customer device is dynamically directed toward their location. In the analysis presented herein, predicted exposure levels are based on all beams at full utilization (i.e. full power) simultaneously focused in any direction. As this condition is unlikely to occur, the actual power density levels at ground and at adjacent structures are expected to be less than the levels reported below. These theoretical results represent maximum-case predictions as all RF emitters are assumed to be operating at 100% duty cycle.

Analysis

proposes the following installation at this location:

- REMOVE (9) EXISTING PANEL ANTENNAS, TYP. 3 PER SECTOR.
- REMOVE (3) EXISTING RRUS 4478 B5, TYP. 1 PER SECTOR.
- INSTALL (12) NEW PANEL ANTENNAS, TYP. 4 PER SECTOR.
- INSTALL (3) NEW RRUS 4449 B5/B12, TYP. 1 PER SECTOR.

The antennas will be mounted on a 19-foot Monopole with centerlines 15.33, 17, and 18.66 feet above ground level. Proposed antenna operating parameters are listed in Appendix A. Other appurtenances such as GPS antennas, RRUs and hybrid cable below the antennas are not sources of RF emissions. Panel antennas have been installed at this site by other wireless operators. Operating parameters for these antennas considered in this analysis are also listed in Appendix A.

Figure 1: Antenna Locations

Power density decreases significantly with distance from any antenna. The panel-type antennas to be employed at this site are highly directional by design and the orientation in azimuth and mounting elevation, as documented, serves to reduce the potential to exceed MPE limits at any location other than directly in front of the antennas. For accessible areas at ground level, the maximum predicted power density level resulting from all operations is 94.9271% of the FCC General Population limits. There are no apparent inhabited

Cordelia - Modification 11.20.2023

buildings or accessible structures in the immediate area as depicted in Figure 1.1 The proposed operation will not expose members of the General Public to hazardous levels of RF energy at ground level or in adjacent structures.

Waterford Consultants, LLC recommends posting RF alerting signage with contact information (Caution 2B) at the base of the Monopole to inform authorized climbers of potential conditions near the antennas. These recommendations are depicted in Figure 2.

February 9, 2024

Project Description: 3600 Ritchie Rd

MODIFICATION TO AN UNMANNED TELECOMMUNICATIONS FACILITY,
CONSISTING OF THE FOLLOWING:

ANTENNA LOCATION:

- REMOVE (9) EXISTING PANEL ANTENNAS, TYP. 3 PER SECTOR
- REMOVE (6) EXISTING TMAs, TYP. 2 PER SECTOR
- REMOVE (3) EXISTING RRUS 4478 B5, TYP. 1 PER SECTOR
- INSTALL (12) NEW PANEL ANTENNAS, TYP. 4 PER SECTOR
- INSTALL (3) NEW RRUS 4449 B5/B12, TYP. 1 PER SECTOR
- INSTALL (2) NEW DC9 SQUID ON MONOPOLE
- INSTALL (5) NEW #6 AWG DC POWER TRUNK ON MONOPOLE
- INSTALL (2) NEW FIBER TRUNK
- INSTALL (1) WCS FILTER (WCS-IMFQ-AMT-43) FOR SECTOR C, POS.2

EQUIPMENT LOCATION:

- REMOVE (3) EXISTING RRUS 11 B12, TYP. 1 PER SECTOR
- REMOVE (1) EXISTING UMTS CABINET NEAR DOOR
- INSTALL (3) NEW RRUS 4449 B5/B12, TYP. 1 PER SECTOR
- INSTALL (4) NEW RECTIFIERS IN EXISTING DC POWER PLANT
- INSTALL (2) NEW 2P CIRCUIT BREAKERS IN EXISTING AC PANEL
- INSTALL (1) NEW RELAY RACK AND MIGRATE ALL DC12 TO IT
- INSTALL (1) NEW DC12-RM IN NEW RELAY RACK
- INSTALL (1) NEW 6648 BBU IN EXISTING RACK

Planner Project Description Summary:

REMOVE (currently existing equipment that will be removed and not replaced)

6x TMAs typ. 2 per sector

1x UMTS cabinet near the door

REPLACE

9x with 12x panel antennas, typ. 4 per sector

3x RRU's: (4478 B5, typ.1 per sector) with (4449 B5/B12, typ. 1 per sector)

ADD (equipment does not currently exist on the structure)

2x DC9 squid on monopole

5x #6 AWG DC power trunk on monopole

2x Fiber trunk

1x WCS filter (WCS-IMFQ-AMT-43)for sector C, pos. 2

4x rectifiers in existing DC power plant

2x 2p circuit breakers in AC panel

1x Relay rack and migrate all DC12 to it

1x DC12-RM in new relay rack

1x 6648 BBU in existing rack

Planning Services Division

April 11th, 2024

Mr. Greg Davis
23 Mauchly Ste 110
Irvine, CA 92618

Via email: gdavis@clinellc.com

RE: Application No. U-24-02, to modify a previously permitted (U-12-10) unmanned telecommunications facility (APN: 0044-050-160 & 430).

Dear Mr. Davis,

On February 8th, 2024, this department received the Use Permit application (U-24-02) to modify a previously permitted (U-12-10) unmanned telecommunications facility. The parcel is located at 3600 Ritchie Road within the Rural Residential 2.5-acre minimum zoning district (RR-2.5).

The application was reviewed by the Development Review Committee on March 13th, 2024 and based on comments received from Planning Division staff and other applicable agencies, your application is considered complete in accordance with Section 65943 of the Government Code.

The project is subject to the California Environmental Quality Act and qualifies for a class two Categorical Exemption 15302: Replacement or Reconstruction; therefore, no further environmental review is required.

The next step will be preparing the conditions of approval, staff report, and public hearing notice for the Planning Commission to take action. I am working towards scheduling the application for a Planning Commission hearing, which will tentatively take place on June 6, 2024.

On April 9, 2024, the Board of Supervisors, adopted a Good Neighbor Policy that *strongly recommends* project proponents engage with the community to increase transparency and public dialogue prior to the formal public hearing process. Although additional outreach is not a requirement, the Planning Services Division *strongly recommends* that New Cingular Wireless reach out to property owners within ½ mile of the property.

Outreach methods may include community meetings, a project website, flyers or fact sheets. If you choose to develop a public website, it should be done in conjunction with other direct outreach methods to ensure public awareness. Outreach materials shall describe the proposed project, location, development plans, timeline of the project, and applicant contact information. It is the applicant's responsibility to bear the costs of the additional outreach, and the applicant shall not

include the County logo or County point of contact on any outreach materials. Following outreach efforts, applicants are encouraged to submit a Good Neighbor Report which contains information about the property owners contacted, a summary of issues raised, and responses to any public concerns. A list of property owners, a map and their contact information within ½ mile of the site, consistent with the adopted Good Neighbor Policy, are attached for your convenience.

If you choose to conduct additional outreach pursuant to the Good Neighbor Policy, please inform me as soon as possible so Planning staff is aware and to avoid delays in processing. Planning staff requests the opportunity to review of the draft flyer or other outreach materials at least three (3) business days prior to mail out. In addition, Planning staff requests that the Good Neighbor Report be provided three (3) weeks prior to the public hearing for incorporation into the staff report for Planning Commission consideration.

A copy of the adopted Good Neighbor Policy is attached and please refer to the policy for further details.

I will keep you posted on the progress and if you have any questions or would like to meet and discuss this project review, please feel free to contact me at (707) 784-3112 or apipkin@solanocounty.com

Sincerely,

Abigail Pipkin
Assistant Planner

RESOLUTION NO. 2024-37

**RESOLUTION OF THE SOLANO COUNTY BOARD OF SUPERVISORS
APPROVING A GOOD NEIGHBOR POLICY TO BE STRONGLY RECOMMENDED TO BE
FOLLOWED FOR VARIOUS CATEGORIES OF LAND USE ENTITLEMENT APPLICATIONS IN
THE UNINCORPORATED AREA OF SOLANO COUNTY**

Whereas, on December 12, 2023, the Board of Supervisors discussed the merits of developing a “Good Neighbor Policy” and authorized a commitment of staff time to draft a policy and return to the Board of Supervisors for consideration and possible adoption; and

Whereas, the Board discussed the benefits of early community outreach relative to community education on land use proposals and increased dialogue between applicants and the community; and

Whereas, the Board also weighed the legal and procedural ramifications of such a policy and how it would be implemented; and

Whereas, the Board discussed that the potential costs of implementing the “Good Neighbor Policy”, including securing meeting facilities, providing meeting notices/flyers, preparation of a website, and completing a “Good Neighbor Policy” Outreach Report will be borne by the applicant; and

Whereas, on March 26, 2024, the Board considered and discussed the proposed “Good Neighbor Policy” and provided direction to staff to return to the Board with additional modifications to the policy; and

Whereas, on April 09, 2024, the Board further considered the “Good Neighbor Policy” and determined that it is a desirable part of the planning entitlement and development process.

Resolved, that the Solano County Board of Supervisors approves the “Good Neighbor Policy”, attached as Exhibit A, for use for certain development projects in the unincorporated area of Solano County.

Passed and adopted by the Solano County Board of Supervisors at its regular meeting on April 09, 2024, by the following vote:

AYES: SUPERVISORS Hannigan, Brown, Williams, Vasquez, and Chair Mashburn

NOES: SUPERVISORS None

EXCUSED: SUPERVISORS None

MITCH H. MASHBURN, Chair
Solano County Board of Supervisors

ATTEST:
BILL EMLLEN, Clerk
Solano County Board of Supervisors

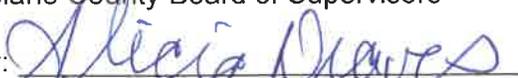

By: 
Alicia Draves, Chief Deputy Clerk

EXHIBIT A

Good Neighbor Policy (GNP)

The Good Neighbor Policy (GNP) reflects the County of Solano's commitment to assisting applicants to move proposed land use applications through the planning entitlement process as efficiently as possible. It has been staff's experience that early community outreach conducted in the initial stages of application review, including informational meetings, distributing materials, and open dialogue with neighbors and the community at large, can provide additional clarity to community stakeholders on the scope and nature of a proposed project. It can also be informational to an applicant on possible changes that would address issues identified as a result of any outreach.

Community involvement is a priority for the Planning Commission (PC) and County Board of Supervisors (BOS). Therefore, as an application proceeds through the formal review process, staff will convey the nature of outreach conducted by the applicant pursuant to this policy.

Applicability of the GNP:

The GNP applies to any application where neighbors and the community at large will benefit from knowledge of the development project. The types of projects listed below are a representative sample of those that have historically generated the most community concern and questions, and have benefited from early public outreach:

- Wireless towers in a residential zoning district
- Major subdivision projects (5 or more lots)
- Large special event facilities
- Specific Plans, Policy Plan Overlays and Strategic Plans
- Battery Energy Storage System Facilities
- Public stables with or without horse shows
- Rezoning or General Plan Amendments of properties
- Large wineries and
- Hotels or resort hotels

The GNP also applies to amendments to previously approved projects where, based on the nature and scope of the request, neighbors and the community at large will benefit from knowledge of the amendment. It may also be utilized for other application types depending on the circumstances and staff will discuss the benefits of community outreach for every project regardless of the size or scope of proposed projects.

Who will benefit from the GNP:

- Applicants, by streamlining their planning entitlement process.
- Neighbors, who will learn of potential neighborhood projects and related potential impacts and can provide timely input to the applicant.
- Hearing bodies, who will receive reporting of outreach efforts and therefore not be a sounding board for issues that could have been resolved prior to hearing.
- Contractors doing business in the County, who will know of public outreach expectations.
- The seven incorporated Solano County cities, who will know of the County's GNP process.

How an applicant will know the GNP applies, timing, and what level of outreach is recommended:

During the initial review of a land use application and within one (1) week, the Director of Resource Management or designee will convey to the applicant the level of recommended community outreach pursuant to the GNP.

Applicants are strongly recommended to follow the GNP after the application is deemed “complete” by the Department of Resource Management and prior to the project being brought to a public hearing.¹ A “complete” application satisfies the County requirements to continue project analysis and is ready for public input. Special circumstances may need to be further defined and presented to the public – such as the scope, land use proposals of the project, and potential impacts to the environment, traffic, human health, social justice, etc. The County strongly recommends that the applicant/property owner(s) conduct at least one community meeting.

It is the applicant’s responsibility to pay for the reasonable costs of conducting community meeting(s) and other outreach pursuant to the GNP, including the meeting facility, mailing notices, website and preparation of the **Good Neighbor Policy Outreach Report (GNR)**. The applicant/property owner is expected to submit a GNR after the community meeting to demonstrate the extent of outreach conducted and any changes to the project as a result of the process. Additional information on public outreach methods and recommended procedures is provided below.

Projects served by private roads:

Private roads are typically owned and maintained by adjacent property owners. If your project requires access via a shared roadway, it is recommended that you contact impacted property owners in advance of submitting a formal application. Planning staff encourages early contact with the involved property owners who utilize the private road for them to understand the possible implications of the project; thus, expediting the planning entitlement process. Projects depending on private road access may cause impacts to the shared road and will require the consent of all property owners to widen, improve, or continuously maintain the private road.

Good Neighbor Policy Procedures (after receiving initial plan comments from County staff):

It is recommended that applicants reach out to their District Supervisor’s office to notify them of their project prior to public outreach. Once the Supervisor’s office is briefed, the applicant can send flyers, factsheets and/or create a project website and/or host initial public meetings with neighbors. Flyers and factsheets can be sent to properties in the vicinity of a proposed project in advance of or in conjunction with a community outreach meeting. A project website may also be established by the applicant as part of the GNP but should be done in combination with other direct outreach methods. Although various methods of outreach are permissible, in-person meetings have traditionally been most successful in collecting meaningful public feedback. All outreach conducted pursuant to the GNP is expected to take place prior to bringing the project forward to any formal public hearing required for a planning entitlement.

Public meetings/open houses should be held at times of maximum participation (i.e. after work or Saturdays) and should avoid holidays/common travel periods.

Neighborhood notification in the form of flyers or fact sheets should be reviewed by County Planning staff prior to distribution. The flyer, fact sheet, or website shall not include County Logo or County staff contact information. At a minimum, the flyer, fact sheet, or website should include the following information to assist the public in understanding your project:

- For mailings: An envelope with clear markings such as "Potential Project in Your Area";
- Project site map with notice radius identified;
- Proposed development plans;
- Applicant contact information;
- Projected timeline of the project; and
- Project website, if any, and opportunity to provide feedback by email or online form to the applicant.

¹ Please note that a determination by the Department of Resource Management that an application is “complete” is neither approval nor denial of the application, nor does it imply completion of Good Neighbor Policy Outreach will result in final project approval.

The applicant will need to prepare and provide project information to nearby property owners and residents. County Planning staff may suggest engaging a larger area or specific interested parties such as the nearby Homeowners Association on a case-by-case basis depending on the planning entitlement requested. The following table summarizes recommended notice and outreach pursuant to the GNP:

Zone District	Notice Radius*	Type of Outreach Materials
<ul style="list-style-type: none"> • Agricultural (A) or Rural Residential (RR) zone district • Major Subdivision (5 or more lots) without zone changes • All other zone districts 	Notify owners within ½ mile of the property	Flyers and fact sheets complete with proposed project information and applicant contact information (prepared and distributed by the applicant). Public meeting and GNR completion are strongly recommended prior to public hearing.

* County Planning staff can provide the list of property owners from the latest assessment roll, and a map of the surrounding property owners. Please request this data early of County staff in your outreach process for timely results.

Good Neighbor Report (GNR) – Summarizing results of community involvement outreach effort:

It is recommended that the applicant/property owner submit a GNR review after the community meeting or meetings depending upon the circumstances. The GNR submitted to County staff should detail the key results of the public involvement meeting and other input that has been received. A typical GNR would include the details of the meetings, meeting agenda, photos, meeting minutes summarizing comments received, key issues, and a list of participants. Additionally, audio or video recordings could be provided (upon community participant approval to be recorded).

Example of a community outreach meeting sign-in sheet:

Name (printed)	Signature	Address	Renter or Owner	Date	Have no objections	Have objections (Please state briefly)	Have no comment
EXAMPLE							

It is recommended that the GNR include the following information and be submitted to County Planning staff prior to bringing your project to the PC or BOS hearing:

1. Applicant’s contact information.
2. Documentation of the Property Owners contacted – Assessor Parcel Numbers (APN), address, and method(s) of communication such as face-to-face interviews, mailers, or both. Flyers or fact sheets mailed by the United States Postal Service using a Certificate of Mailing (Form 3788), or another form of registered mail with proof of mailing, provided to staff.
3. Comments or Concerns organized by Property Owners Name, APNs, address, date mailed out, date comments received, and email addresses, if any. The GNR shall clearly include and state the issues raised by the property owners and the actions taken to address the concerns.

Additional Good Neighbor recommendations during the planning application process or after submitting a land use application:

The level of outreach is dependent on the complexity of the project and may involve conducting additional community outreach meetings.

Typical timeline of action by applicant:

		Application not yet deemed "Complete" and Initial Application Comments are received from County staff	Application is "Complete" and Prior to PC or BOS hearing	Public Hearing (PC or BOS)
Applicant's typical process for Community Involvement	Applicant submits application to Planning Services Division	It is <u>recommended</u> that applicants reach out to their District Supervisor's District Representatives to notify the office of a project prior to conducting outreach. Once the Supervisor's office is briefed, applicant may send flyers, factsheets, and/or create a project website and/or host Initial public meeting(s) with neighbors. Neighbors on private roads are <u>strongly recommended</u> to be contacted.	Applicant is <u>recommended</u> to host public meeting with neighbors and provide GNR to County staff prior to project being heard by hearing body.	County planning staff will bring forward staff report to hearing body formulating input of community outreach, per GNR.

For more information:

Contact County Planning Services Division staff for guidance regarding the recommended level of community engagement to be held during the planning application process. Email Planning@solanocounty.com or phone 707-784-6765 and request to speak to the Planner on Duty.

DEPARTMENT OF RESOURCE MANAGEMENT

Planning Services Division

NOTICE OF PUBLIC HEARING (Planning Commission)

NOTICE IS HEREBY GIVEN that the Solano County Planning Commission will hold a PUBLIC HEARING to consider Use Permit Application No: U-24-02 of Centerline LLC, an agent of New Cingular Wireless, to replace antennas, electrical equipment and reduce the height of an existing monopole from 20 feet 11 inches to 20 feet. The site is located at 3600 Ritchie Road, bordering the City of Fairfield in the Rural Residential (RR 2.5) zone. The project is exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guidelines Sections 15301 and 15303. (Project Planner: Abigail Pipkin, 707-784-6765)

The hearing will be held on **Thursday, June 6, 2024, at 7:00 p.m.** in the Board of Supervisors Chambers, County Administration Center, 1st Floor, 675 Texas Street, Fairfield, California. Staff reports and associated materials will be available to the public approximately one week prior to the meeting at www.solanocounty.com under Departments; Resource Management; Boards, Commissions & Special Districts; Solano County Planning Commission.

The County of Solano does not discriminate against persons with disabilities. If you wish to participate in this meeting and you will require assistance in order to do so, please contact the Department of Resource Management at 707-784-6765 at least 24 hours in advance of the event to make reasonable arrangements to ensure accessibility to this meeting.

PUBLIC COMMENTS:

In-Person: You may attend the public hearing at the time and location listed above and provide comments during the public speaking period. Phone: You may provide comments verbally from your phone by dialing **1-415-655-0001** and entering **Access Code 2632 666 6680**. Once entered in the meeting, you will be able to hear the meeting and will be called upon to speak during the public speaking period. Email/Mail: Written comments can be emailed to PlanningCommission@SolanoCounty.com or mailed to Resource Management, Planning Commission, 675 Texas Street, Suite 5500, Fairfield, CA 94533 and must be received by 10:00 a.m. the day of the meeting. Copies of written comments received will be provided to the Planning Commission and will become a part of the official record but will not be read aloud at the meeting.

If you challenge the proposed consideration in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the Planning Commission at, or prior to, the public hearing.
